Turkish Coffee

It is the oldest coffee brewing method in the world.

Foam consists of coffee and grounds.

FEATURES OF TURKISH COFFEE

It is very practical and economical because all you need while cooking is a coffee pot.

In order to give that delicious taste, it should either be consumed immediately after roasting or packaged to preserve its aroma.

Delicious Turkish Coffee is roasted, ground and packaged using advanced technology with traditional care and meticulousness.

You can take our Delicious Turkish Coffee, which is presented in special packages, as much as you want and keep it until the expiry date. With its smell, taste, it will preserve the freshness of the day it was ground.

Compared to other types of coffee, it contains less caffeine in one drink.

Amount of Caffeine in a Serving

- * Turkish Coffee 65 ml (one cup) 60 mg
- * Espresso Coffee 60 ml (one cup) 100 mg
- * Filter Coffee 150 ml (one cup) 115–175 mg
- * Instant Coffee 150 ml (one cup) 65–100 mg
